## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Compass Exploration, Inc. proposes to drill a well at the above to penetrate the Desert Creek Zone of the Paradox formation. The approx. total depth of the well will be 5500 feet. Tentative Drilling Program as follows:

- 1) Drill to 225' - Run 225', 10 3/4" surface casing & cement with sufficient cement to circulate
- 2) Drill a 6 3/4" hole to total. If a waterflow is encountered in the Navajo formation run 7 5/8 intermediate string to approx. 1400'. Cement with approximately 100 sax and complete annulus for drilling water.
- 3) At total depth run Induction-Electrical log, Gamma-Ray Sonic, and Microlog
- 4) If well is productive completion will be made in conventional manner.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Attention: P. J. Farrelly, Mgr. of Prod. & Expl.

Gentlemen:

This is to acknowledge receipt of your notice of intention to drill Well No. Gothic Mesa South #1-28, which is to be located 660 feet from the north line and 1980 feet from the east line of Section 28, Township 41 South, Range 23 East, SLBM, San Juan County, Utah.

Please be advised that insofar as this office is concerned, approval to drill said well is hereby granted.

As soon as you have determined that it will be necessary to plug and abandon the above mentioned well, you are hereby requested to immediately notify the following:

PAUL W. BURCHELL, Chief Petroleum Engineer  
Office: DA 8-5771 or DA 8-5772  
Home: CR 7-2890  
Salt Lake City, Utah

This approval terminates within 90 days if the above mentioned well has not been spudded in within said period.

Enclosed please find Form OGCC-8-X, which is to be

September 5, 1963

completed if water sands (aquifers) are encountered while drilling, particularly assessable near surface water sands. Your cooperation with respect to completing this form will be greatly appreciated.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

CLEON B. FREIGHT  
EXECUTIVE DIRECTOR

MEMO FOR FILING:

Re: Compass Exploration Incorporated  
Gothic Mesa South #1-28  
Sec. 28, T. 41 S. R. 23 E.,  
San Juan County, Utah

On October 4, 1963, verbal approval was given to Mr. Pete <sup>Farrelly</sup>~~Farley~~ to plug the above named well in the following manner:

- (1) 50' plug across the top of the Desert Creek at 5606'
- (2) 50' plug across the top of the Hermosa at 4456'
- (3) 100' plug through the DeChelly at 2416'
- (4) 50' plug at the base of the 7 5/8" intermediate string 1/2 in and 1/2 out at 1410'

The following tops were extrapolated from Electric Logs:

Total Depth	5714'	at the base of the Desert Creek Formation.
Top of the Desert Creek	@ 5606'	
Top of the Ismay	@ 5523'	(tight)
Top of the Bluff Sandstone and the Paradox	@ 5407'	(tight)
Top of the Hermosa	@ 4456'	
Top of the DeChelly	@ 2146'	
Top of the Chinley	@ 1210'	
Top of the Navajo	@ 900'	

The well has approximately 225' of 10 3/4" surface casing which contains sufficient cement to circulate to the surface. Water flow was encountered in the Navajo Formation at 900' and they ran 7 5/8" intermediate string at 1410'. The water was then allowed to flow up the annulus to the surface and verbal approval was given to leave this well as a water well for the Indians. This program received further approval from the U. S. Geological Survey.

FORMER RECORD - CONTINUED

OCT 11 1963

16--43094-2 U. S. GOVERNMENT PRINTING OFFICE

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked", or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or balling.

Spadded 8/31/63 @ 5:00 P.M. Drilled to 225', ran 7 joints 10-3/4" 32.75# surface casing set @ 225' cemented w/150 sax regular cement 2% CaCl. POB 7:00 A.M. 9/1/63. Pressure tested casing 500#, leaked, squeezed 10 sax regular cement. Held okay. Drilled to 1410'. Encountered water flow @ 900' Reamed 9-7/8" hole. Ran 45 joints 7-5/8" 24# intermediate casing set @ 1410' RKB. Cemented w/80 sax rxg 3% CaCl. POB 7:00 A.M. 10/4/63. Pressure tested. Held okay. Drilled 6 1/4" hole to total depth 5714'. Ran DST #1 5646-5714. Shut in 30 minutes. Open 1 hr. Final shut in 30 minutes. Open w/weak blow, died in 5 minutes. Recovered 30 feet drilling mud. ISIP 20#, FSIP 17#, IFP 17#, FFP 17#, IHP 3023#, FHP 3023#. Well plugged and abandoned

5500' to 5714' (TB)	45 cu. ft. cement
4400' to 4500'	25 cu. ft. cement
2325' to 2525'	50 cu. ft. cement
1310' to 1510'	55 cu. ft. cement

Well returned to Navajo tribe Indians as a water well.

AFFIDAVIT AND RECORD OF ABANDONMENT AND PLUGGING

PLUGGING METHODS AND PROCEDURE: -- The method and procedure for plugging a well shall be as follows:

- (a) The bottom of the hole shall be filled to, or a bridge shall be placed at the top of each producing formation open to the well bore, and in either event, a cement plug not less than fifty (50) feet in length shall be placed immediately above each producing formation open to the well bore whenever possible.
- (b) A cement plug not less than fifty (50) feet in length shall be placed at approximately fifty (50) feet above and below all fresh water bearing strata.
- (c) A plug shall be placed at or near the surface of the ground in each hole.
- (d) The interval between plugs shall be filled with heavy mud laden fluid.
- (e) The hole shall be plugged with heavy mud up to the base of the surface string at which point a plug of not less than fifty (50) feet of cement shall be placed.

Field or Pool Wildcat County San Juan  
Lease Name Gothic Mesa SWell No. 1-28 Sec. 28 Twp 41S R. 23E  
Date Well was plugged: October 4, 1963.

Was the well plugged according to regulation of the Commission: yes

Set out method used in plugging the well, the nature and quantities of materials used in plugging, size of plugs, location and extent (by depths) of the plugs of different materials, and the amount of casing left in hole, (giving size, top and bottom elevations of each section of abandoned casing.)

Plugged and abandoned as follows by drill pipe displacement

5500' to 5714' (T.D.)	45 cu.ft. cement	Left in hole
4400' to 4500'	25 cu.ft. cement	Surface casing 10 3/4 to 225
2325' to 2525'	50 cu.ft. cement	Intermediate casing 7 5/8 to 1410'
1310' to 1510'	55 cu.ft. cement

Re: Well No. Gothic Mesa South #1-28  
Sec. 28, T. 41 S, R. 23 E.,  
San Juan County, Utah

Gentlemen:

We are in receipt of your "Log of Oil or Gas Well", U. S. Geological Survey Form 9-330, for the above mentioned well. However, upon checking this log we find that the date this well was plugged and abandoned was omitted from said report.

Please be advised that the electric and/or radio-activity logs for said well are also due and have not been filed with this office as required by our rules and regulations.

If you did not run electric logs on this well, please make a statement to that effect in order to keep our records accurate and complete. Thank you for your cooperation in this request.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

Section 28, T41S, R23E,  
San Juan County, Utah

Gentlemen:

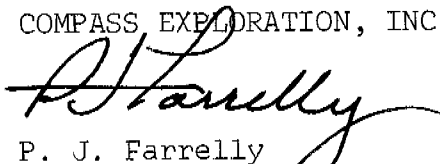

Enclosed you will find two sets of logs on the captioned well.  
Please pardon our delay in forwarding these to you.

We would appreciate it if you would add the plugged and abandoned date of October 4, 1963, to the "Log of Oil or Gas Well",  
U. S. Geological Survey Form 9-330 already submitted to you.

If you require any other information on this well, don't  
hesitate to contact us.

Yours very truly,

IN REPLY REFER TO:

Feb. 3, 1964

Mr. Harvey Coonts  
Utah Oil & Gas Conservation Comm.  
Moab, Utah

Dear Harvey:

The following abandoned wells in San Juan Co., Utah were inspected and approved by this office during January:

Champlin Oil & Refg. No. 2 Navajo 130, NW $\frac{1}{4}$  21-43S-25E  
Continental Oil Co., No. 1 Navajo "E", NW $\frac{1}{4}$  24-42S-23E  
Shell Oil Co., No. 2 Tohonadla, NW $\frac{1}{4}$  7-42S-22E  
Miami Petroleum No. B-1 Navajo Tr. 12, SE $\frac{1}{4}$  28-41S-21E

The following abandoned wells were inspected but not approved:

APCO No. 1-X-28 Navajo, NW $\frac{1}{4}$  28-43S-25E  
Compass Exploration, No. 1-28 Gothic Mesa South, NE $\frac{1}{4}$  28-41S-23E  
Compass Exploration, No. 1-4 Dunes, SW $\frac{1}{4}$  4-42S-23E  
Sunray "DX" No. 1 Navajo "B", NW $\frac{1}{4}$  4-43S-23E
